

Pages £6.99

A word processing app. It allows you to create, edit and view documents on the move. It works similarly to Microsoft Word but is adapted to be used with touch.

Free **Little Writer**

Allows pupils to practice letter formation, by tracing letters on screen, usually with a small game of getting animals to eat fruit.

Tabtale Books Free/ £1.49

There are plenty of titles available; they allow pupils to read the stories on the iPad. Most of these books can read the story to the child, with some allowing the child to record themselves reading to help practice reading and speech.

Restrictions

Restrictions can be turned on to stop access to important parts of the iPad.

Our recommended restrictions would be to turn off the installing and deletion of apps, including in-app purchases (stops worries of expensive bills)

Making sure the content ratings are set to the correct age limit.

Stopping the addition of accounts which, stops e-mail addresses being able to be added as these could be difficult to monitor on a personal device.

All this can be found in

Settings > General > Restrictions

All you need to do is add a code to it to secure it!

A guide by Alderman Richard Hallam
to the:

iPad

We use the iPad in school to research, learn, play educational games, and to create amazing things.

This leaflet includes some of our most useful apps to use with your children to aid them in their educational journey.

There are descriptions of each app and their cost.

iMovie £2.99

This app lets pupils create videos or movies either from scratch or by using a pre-set story board.

Free **Meteor Math**

Children have to select the correct meteors to add, subtract, divide or multiply to the number shown at the top. As the levels increase the amount of numbers change as does the difficulty of the maths involved.

Numberline Frog 69p

This app uses basic maths; it makes use of a number line with a frog jumping to the answer you select. You get a star for each correct answer. Aimed at Foundation and early years.

Free /£3.99 per book

Read with Biff, Chip & Kipper

This app is set around the books of Biff, Chip & Kipper. There are interactive features such as: click and find the object, read along with the story and read the story to me.

Google Earth Free

Allows pupil to search for places, see landscapes or certain parts of the world, and learn where countries boarder one another and even see individual places such as our school!

Free/ 69p **Mathmateer**

A math game in which, pupils answer maths related question to earn money to spend on parts for their rockets. These are then launched into space with maths question appearing in the sky.

Free/ 69p **Monster Physics**

A game that uses physics as the basis, you are tasked with problems that have to be overcome using physics related content such as force, friction and movement. There is differing difficulty and topic related levels.

Bobo & Light £2.99

An app in which you explore how light works with the help of a friendly robot. Topics covered include: lasers, lightning, reflection and refraction. The interactivity helps children to learn about light.

Free **Jumbled Sentences**

This app gets children to arrange sentences by dragging the words into the correct order. They are rewarded with coins that can be then used to get stickers.

Hungry Fish Free

This app gets children to feed a fish with the correct maths answers that appear on its body. By adding the bubbles to the correct number, the fish begins to grow.

£2.49 each **Twinkl Phonics**

Helps children with the learning of phonics.

Planets Free

Allows for an interactive look at the planets within our solar system. You can find out their correspondence to the Earth and view the stars in the night sky.
