

Counting in 10's

Today we are counting in 10's!

Just like the previous days, you may want to use a youtube song to refresh your memory!

Can you practise counting in 10's all the way up to 100?

For today's activity, we would like you to make a lacing plate (don't worry if you don't have any paper plates or string, you can just use a piece of paper and connect the numbers with a pencil). You need to write the numbers around the edge in the wrong order and then lace them up in the correct order. You can use it again and again to help you remember how to count in 10's!
