

Maths - Week 13 Day 4

Can you remember what we looked at yesterday in maths?
That's right! Division! What can you remember about division?

Today we're going to focus on word problems again but this time you can choose which method you want to use, e.g. you can use physical objects or draw the objects into groups.

Up for a challenge?

After you've solved your word problem can you write the division number sentence to go with it, e.g. $6 \div 2 =$

1. Tom has 14 teddy bears and he shares them between 2 of his brothers. How many will they each have?
2. Lucy shares 30 sweets between 5 of her friends. How many will they each have?
3. I have 50 strawberries and I share them between 10 of my class mates. How many will they each have?
4. Jack has 18 blueberries and he shares them between 2 of his best friends. How many will they each have?
5. Kelly has 10 hats and she shares them between 10 friends. How many hats will they each have?
