

Maths - Measuring!

Today we have got another Maths challenge for you focusing on measuring capacity! We want you to get a water bottle and mark it with full, half full and empty. Can you then use coloured water to fill your bottle to these different measurements? If you're up for a challenge, can you use a jug to measure different amounts of millilitres? Email us your work on:

arhyear1@aldermanrichardhallam.leicester.sch.uk
