

Maths - Number Bonds!

Today we have got a Maths challenge for you! We want you to practise finding number bonds to 20. To do this, we want you to get 20 objects from your house—this can be anything (lego bricks, toys, sweets etc.) Then, you need to move the objects into two groups—count how many are in each group and this will give you a number bond to 20. How many different ways can you find to make 20 using your objects?
