

# Parachuting!

This week for your topic project, we would like you to make and test some parachutes for some of your toys.

Choose 3 materials to make 3 different parachutes from, such as a plastic bag, paper or scraps of fabric.

Have a look at parachutes on the internet. Can you make a parachute using the 3 different materials you have chosen?

Make your prediction about which parachute will work best and why you think that.

Ask a grown up to help you drop your parachute from a height and measure the time to see how long it takes to fall.

Whichever parachute takes the longest to fall is the most effective! Please email us and let us know what you found out from this experiment!
