

Today's Geography project is to become a lockdown pirate!

What is a map?- A map is a drawing of all or part of Earth's surface. ... Maps may show visible features, such as rivers and lakes, forests, buildings, and roads. You can use it to help you find your way.

A treasure map uses symbols such as X marks the spot to show where valuable secrets are hidden.

Your challenge is to hide things around your house and make a treasure map of your house to help you find them again. Maybe you can give the map to your adults or siblings and see if they can find the hidden treasures using your map! Remember to label the rooms and use clear symbols.
