

Science- suitability of materials for purposes.

Watch this video about the properties of materials:

<https://www.youtube.com/watch?v=tAEQDu7juEg>

Why do you think the objects below are made from these materials?

	A window is made of glass because....
	The chair is made of fabric because
	The table is made of wood because
	The bottle is made of plastic because ...

Challenge: Can you find some other objects around your house and write about why they are made of those materials?
